

Dear Parents / Carers,

I can't believe that yet another week has flown by and we are fast approaching the end of June! Thank you to everyone who has sent in photographs of the children and copies of work that they have completed. As always we all love seeing what you have been up to, it helps us feel connected in these strange and unprecedented circumstances.

As we are getting near to the end of the Year 2 curriculum, for the last few weeks I would like to encourage the children to revisit some of the key skills that they need to be secure with as they transition to Year 3. This means that we will be looking at calculations involving all four operations in Maths and some of the grammar, punctuation and spelling skills in English. These are all skills that we have worked on previously in class so they should be familiar with them and be able to develop them further over the next few weeks.

I have prepared a new plan for this week and attached some resources to it but I have also put some worksheets on to Purple Mash, should you wish to use them. Please remember that this plan is meant as a guide and you should work with your children at their pace. This may mean that they do not complete all the tasks or you may decide to spend longer on one particular skill but that is absolutely fine as long as they understand what they are doing. As usual, please feel free to e-mail blue@beaupre.cambs.sch.uk if you have any questions.

Keep looking after yourselves and don't forget to carry on sending in the photos for the newsletter, they are greatly appreciated by everybody.

Miss Carpenter

Task	English - Reading	English - Writing	Maths
1	<p>Reading comprehension</p> <p>Have a look at the reading comprehension sheet about penguins</p> <p>Make a list of any words that you don't know the meaning of and see if you can find out what they mean</p>	<p>This week we are going to continue looking at some of the grammar, punctuation and spelling skills that we need to use in our writing.</p> <p>Task 1 For this session we are looking at tenses. We can change the tense of verbs depending on whether our sentence is referring to something that is happening in the past/present/future</p> <p>Past – this means that something has already happened. E.g. Sam walked home.</p> <p>Present – this means that something is happening now. E.g. Sam walks home.</p> <p>Future – this means that something is going to happen. E.g. Sam will be walking home.</p> <p>For this session we are focusing on past and present tense. E.g. The dog barked at the cat (simple past tense). The dog barks at the cat (simple present tense).</p> <p>Have a look at the video clip below the try the quiz at the end. https://www.bbc.co.uk/bitesize/topics/zrqqtfr/articles/z3dbg82</p> <p>Now have a look at the activity attached to this plan.</p>	<p>Maths brain warm-up: time yourself to see how long it takes you to say your 2/5/10 times tables</p> <p>This week we are going to be looking at solving calculations. You will be using all four operations (+ - x ÷) which you have used before. Remember that is the question is written in words then you will need to look for the clues to tell you what calculation to use E.g. Sam has nine toy cars and Ben has eight toy cars, how many do they have altogether?</p> <p>Key words are:- nine, eight, altogether These words tell me that the number sentence will be $9 + 8 =$ this is because the word altogether means add.</p> <p>Task 1 Have a look at the activity sheet attached to this plan. You will see that we are starting with place value just to get your maths brains warmed up for later in the week!</p>
2	<p>Read the penguin sheet again and complete the questions about what you have read.</p>	<p>Task 2 Following on from the previous session, we are continuing to look at past and present tense. Remember to think about how the verb will change if it is in past/present tense.</p>	<p>Maths brain warm up: write down all the odd numbers between 0 and 50</p> <p>Task 2 This session has some number sentence problems and some written problems for you to work on, again this will let you remember all the number skills you have already learnt.</p>

Blue Class – Home Learning – w.b. 29th June 2020

	Can you pick out at least two interesting facts that you could share with someone in your family?		
3	Choose a book from your bookshelf or from the online reading site below	<p>Task 3 This session we are looking at the different types of sentence. We have looked at these before and you will remember that the different types are:</p> <p>Statement https://www.bbc.co.uk/bitesize/articles/z97r2nb</p> <p>Question https://www.bbc.co.uk/bitesize/topics/zrqqtfr/articles/z2xdng8</p> <p>Exclamation https://www.bbc.co.uk/bitesize/topics/zrqqtfr/articles/zqbjy4j</p> <p>Command https://www.bbc.co.uk/bitesize/topics/zrqqtfr/articles/z8strwx</p> <p>Have a look at the activity sheet and see how you get on.</p>	<p>Maths brain warm up – write down all the odd number between 50 and 100</p> <p>Task 3 This session starts to get a little bit trickier, you will need to solve the multiplication and division problems to help the wizard find the potion that he is looking for, good luck.</p>
4	Continue with your chosen book	<p>Task 4 For this session we are going to do a bit more work with exclamation sentences just to make sure that we understand what they are and what punctuation we can use with them</p>	<p>Maths brain warm up: write down 6 numbers then see if you can write down what 3 more and 3 less of each of your numbers will be E.g. if I choose the number 17 three more will be 20 and three less will be 14</p> <p>Task 4 There are three different levels of the ‘whole school picnic’ problems. Choose a level that you can find the answers to but make sure it’s not too easy for you!! If you really want to challenge yourself you could work your way through all three levels!!</p>

5	Task 5 Write a book review for a book that you have read this week	Task 5 This session is a challenge for you to use what you have learnt this week and see if you can write about something you have done this week, it can be anything from playing a computer game to helping someone in your family. See if you can include different tenses in your writing, can you use different sentence types and include the correct punctuation? See how you get on and don't forget you can email your work for us to see. blue@beaupre.cambs.sch.uk	Maths brain warm up: mental maths – see if you can work out the answer in your head and then explain to someone how you did it. $27 + 33 + 19 =$ Task 5 Again there are different levels of this task, choose which one you would like to do. Don't forget you can use jottings to help you work out the answers.

**** if you would like any more maths challenges this week, I have put some extra ones on purple mash in the Blue class work folder.**

Reading

Penguins

Penguins live in hot and cold places in the Southern Hemisphere. This is the bottom half of the world, below the Equator. They have wings but they can not fly. There are 17 sorts of penguin.

This is an Emperor penguin. It is the biggest penguin. It has patches of yellow on its ears and breast. They live in a very cold place called Antarctica and catch fish from the sea to eat. They do not build a nest. The male penguin holds eggs in its belly pouch and baby penguins stand on the male penguins feet so that they do not get cold.

This is a Little penguin. It is the smallest penguin and is sometimes called a Blue penguin. It lives in Australia and New Zealand. They usually make a hole in the ground to lay their eggs and the male and female take it in turns to look after them.

This is an African penguin. They live in Africa. It has a black band on its white breast and patches of skin of its face. The skin helps the penguin to cool down when it gets too hot. It digs into the ground to lay its eggs.

This is an Adelie penguin. They have long tails that drag along the ground and white around their eyes. The female penguin lays her eggs in a nest that she makes with pebbles and moss. The male keeps the eggs warm and the female goes to hunt for food. Then they swap jobs.

This is a Humboldt penguin. It is sometimes called a Peruvian penguin. They live in South America. It has patches of skin on its face to help it cool down and it has a black bill. It digs into the ground to lay its eggs.

This is a Snares penguin. They live on an island in New Zealand. It has a yellow crest on its face and red eyes. The lady penguin lays 2 eggs in a nest. The first one is a lot smaller than the second one. The second egg hatches a much bigger penguin that is better at surviving.

Penguins

Complete this table with ✓.

Type of Penguin	Builds a Nest	Lives in a cold place	Lives in a hot place	Digs a hole for a nest	Balances baby on its feet	Red Eyes	Yellow Crest
Emperor							
Snares							
Adelie							
Little							
African							
Humboldt							

Why has the writer put the information in boxes?

What do penguins use their wings for?

Do you think all penguins lay eggs?

Why do you think Emperor penguins do not build a nest?

Which two penguins are the most similar?

Maths Task 2

Dungeon Run

Activity Sheet

Name: _____ Class: _____

How quickly can you answer the questions and get through the Dungeon Run to find Granny and the gang?

Watch the clock or ask your teacher for a timer and time yourself.

3, 2, 1, Go!

1 Add together 23 and 7 _____

2 8 plus 34 = _____

3 What must be added to 18 to get to 27? _____

4 $7 + 7 + 7 =$ _____

5 $65 + 15 =$ _____

6 42 plus 36 = _____

7 What is the total of 23, 8 and 7? _____

8 9 plus 9 plus 18 equals _____

9 $10 + 12 + 34 =$ _____

10 What must be added to 38 to get 50? _____

My time was _____

Complete the number sentences by filling in the blanks.

- a $50 + \underline{\quad} = 56$
- b $\underline{\quad} + 16 = 23$
- c $\underline{\quad} + 55 = 97$
- d $8 + \underline{\quad} + 24 = 42$

Fluffy Clouds

Activity Sheet

Name: _____ Class: _____

Klara and Manu have set a sunny day brain challenge!

How quickly can you answer all of these questions?

Watch the clock or ask your teacher for a timer and time yourself.

Go!

- 1 $50 - 25 =$ _____
- 2 Twenty two subtract ten equals _____
- 3 36 take away 25 = _____
- 4 Subtract 12 from 36. _____
- 5 $80 - 75 =$ _____
- 6 What is left when 10 is subtracted from 60? _____
- 7 Take 40 away from 100. _____
- 8 $39 - 25 =$ _____
- 9 72 subtract 30 = _____
- 10 What is left if you subtract 50 from 110? _____

My time was _____

Write down some subtraction questions that will give the following answers.

- a $\underline{\quad} - \underline{\quad} = 4$ b $\underline{\quad} - \underline{\quad} = 40$ c $\underline{\quad} - \underline{\quad} = 15$
- d $\underline{\quad} - \underline{\quad} = 22$ e $\underline{\quad} - \underline{\quad} = 50$

Maths Task 3

Reasoning and Problem Solving Multiplication and Division Consolidation – Year 2

Welcome to Puddington's Potion Academy. A team of famous wizards are trying to figure out the lost ingredient in a top secret magic potion. No wizard since Puddington himself has ever successfully created this potion in the history of the Academy.

"Legend has it that whoever gets this spell right shall get the sweetest riches!" exclaims Giovanni the Great. "Not to mention the bragging rights – get ready to go down in history! Before we get started, we have to make sense of this cupboard – I can't find a thing I'm looking for!"

1. Have the bottles been correctly sorted into equal groups? Explain why or why not. If not, how can you make them equal?

2. Create a label for each shelf with a multiplication sentence to describe how it has been sorted.

2a.

2b.

2c.

classroomsecrets.co.uk

Consolidation Pack – Year 2 – Expected

Reasoning and Problem Solving Multiplication and Division Consolidation – Year 2

As Giovanni set off trying to recreate the potion, the other wizards had their own ideas. "I can't believe we're all out of spider leg juice! I'm sure that's the lost ingredient." Xander the Extraordinary mumbles to himself. "I'll just quickly whip up some more! Eight legs to a spider, eight spiders to a bottle – I need eight spiders in total, then that reward is all mine!"

3. Add the equal groups of spiders to see which group should be bottled.

Perfect! Xander waves his wand twice and mutters the magic words...

4. "Crikey! How on earth have I managed to make sixty bottles of spider leg juice? I should put these bottles on the shelves before Giovanni notices and shouts again." If ten bottles fit on one shelf, how many shelves will store 60 extra bottles?

"Enough of these games - those riches are all mine, fools!" cackles Mauricio the Magnificent. "I've figured out the real, secret ingredient – stand back!"

5. If Mauricio has the following number of bats, how many bat wings will he have for his potion?

Bats	Bat wings
3	
8	
10	
12	

"Alakazim, alakazam – oh crumbs!" With a huge puff of smoke, a tiny flame sizzles out in his hands. "Maybe bat wings aren't the way to go after all... hmph!"

classroomsecrets.co.uk

Consolidation Pack – Year 2 – Expected

Reasoning and Problem Solving
Multiplication and Division Consolidation – Year 2

The smoke clears and a small voice pipes up from the back of the room, "You wizards are all so greedy!"

"What – who is that?" squints Giovanni.

"Ivan? Tiny Ivan? This is a bit out of your league, kid!" chuckles Xander.

"I will not be sharing my hard-earned riches with a student!" bellows Mauricio. "Get out of here!"

6. "You have bad attitudes for such important wizards. I know what to do – I'll make enough for all of us!" Change his recipe so the potion serves 5.

Ingredient	Amount for 1	To serve 5
rainbow berries	6	
ladybird eye lashes	4	
mermaid tears	9	
unicorn tail hairs	7	

Ivan waves his wand and says the magic words:

--

With a sparkly blast, the room is filled with the richest sweets the wizards have ever seen!

"What remarkable treasure!" exclaims Xander the Extraordinary. "The sweetest riches indeed!" laughs Giovanni the Great. "Bah! I'm going home!" grumbles Mauricio the Magnificent. A deep voice booms from the doorway: "Well done, Ivan." says Professor Puddington. "A generous spirit is truly a magical thing. From now on, you shall be known to all as Ivan the Incredible!"

Maths Task 4

Whole School Picnic Word Problems

A school is planning a picnic for the last day of the summer term. Mrs. Ivanov, the school cook, is preparing all the food. She is sometimes a bit forgetful so has got muddled with some of her ingredients. Help her sort out the problems.

She bought 28 cucumbers but only needs 7. How many spare will she have?

	28
-	7
<hr/>	

She bought 17 tomatoes but needs 2 more. How many does she need altogether?

	17
+	2
<hr/>	

She bought 11 loaves of bread but needs 8 more. How many does she need altogether?

	11
+	8
<hr/>	

She bought 57 carrots but only needs 6. How many spare will she have?

	57
-	6
<hr/>	

She bought 26 lemons but needs 4 more. How many does she need altogether?

	26
+	4
<hr/>	

She bought 36 bananas but needs 3 more. How many does she need altogether?

<hr/>	

She bought 49 lettuces but only needs 8. How many spare will she have?

<hr/>	

She bought 68 yoghurts but needs 2 more. How many does she need altogether?

<hr/>	

She bought 19 blocks of cheese but only needs 8. How many spare will she have?

<hr/>	

She bought 50 apples but needs 20 more. How many does she need altogether?

Reasoning and Problem Solving
Multiplication and Division Consolidation – Year 2

- No, because the second shelf has six bottles and the bottom shelf has four.
To make them equal, you could take one bottle from the second shelf and move it to the bottom shelf.
- $a - 3 \times 2 = 6$; $b - 3 \times 4 = 12$; $c - 2 \times 4 = 8$ and $d - 3 \times 3 = 9$
- $3 + 3 = 6$; $4 + 4 = 8$ so the second group should be bottled.
- $10 \times 6 = 60$ so ten shelves are required to store 60 bottles.

Complete each sentence by using the correct verb tense.

~~ran~~ ~~will run~~ ~~running~~

- Are you **running** in the race?
- Yesterday, I **ran** in the race.
- Tomorrow I **will run** in the race.

Application and Reasoning
Using Simple Past and Present Tenses

Developing

1a. A. The dog growls at the cat. B. She is a good runner. C. I go to my dad's house on Friday.
2a. Various answers, for example: I skipped across the playground.
3a. She is incorrect. She has written in the present tense. It should be: I danced to the music.

Application and Reasoning
Using Simple Past and Present Tenses

Developing

1b. A. My dad was a builder. B. My mum walked to work. C. I was in Year 2.
2b. I hop on one leg.
3b. He is incorrect. He has written in the past tense. It should be: I live in Manchester.

Application and Reasoning
Consolidating Past and Present Tense

Developing

1a. A: He bangs the drum.
B: Mum cooked lunch for everyone.
2a. Various answers, for example:
Present tense – The magic gnome stirs the potion.
Past tense – The magic gnome stirred the potion.
3a. Various answers, for example: He folded a new paper aeroplane to play with.
If it was written in the present tense, I would need to change 'folded' to 'folds'.

Expected

4a. A: At playtime, he raced around the playground.
B: He walks for miles to get to school.
5a. Various answers, for example:
Present tense – The powerful witch flies to her hidden cave.
Past tense – The powerful witch flew to her hidden cave.
6a. Various answers, for example: The pilot landed the plane safely at the airport.
If it was written in the present tense, I would have to change 'landed' to 'lands'.

Greater Depth

7a. A: He speaks so fast that it is impossible for others to understand him.
B: She took her dog everywhere she went.
8a. Various answers, for example:
Present tense – The fortune teller foretells of a princess that will slay the dragon.
Past tense – The fortune teller foretold of a princess that would slay the dragon.
9a. Various answers, for example: The wizard chanted his spell but before he finished, a troll smashed through the door.
If it was written in the present tense, I would have to change 'chanted' to 'chants', 'finished' to 'finishes' and 'smashed' to 'smashes'.

Application and Reasoning
Consolidating Past and Present Tense

Developing

1b. A: Jason sounds the alarm.
B: She liked to play football.
2b. Various answers, for example:
Present tense – The fairy listens to the wizard.
Past tense – The fairy listened to the wizard.
3b. Various answers, for example: She watches cartoons on Saturday.
If it was written in the past tense, I would have to change 'watches' to 'watched'.

Expected

4b. A: He hides it in a chest and puts it in the sand.
B: Jenny threw the ball the farthest.
5b. Various answers, for example:
Present tense – The frog prince hops back onto his throne.
Past tense – The frog prince hopped back onto his throne.
6b. Various answers, for example: She drives so fast that one else stands a chance at winning.
If it was written in the past tense, I would need to change 'drives' to 'drove'.

Greater Depth

7b. A: They fight and fight until the evil wizard finally surrenders.
B: She lost her keys before she went to work.
8b. Various, for example:
Present tense – The wise owl teaches the knight how to deal with the ghost.
Past tense – The wise owl taught the knight how to deal with the ghost.
9b. Various answers, for example: He strokes the dog gently with his small hands and giggles as it pants happily. If it was written in the past tense, I would have to change 'strokes' to 'stroked', 'giggles' to 'giggled' and 'pants' to 'panted'.

Varied Fluency
Consolidation of Sentence Types 1

Developing
