

## Purple Class Homework

### Purple Mash

Every Friday a piece of work will be set for your child on Purple Mash (<https://www.purplemash.com/sch/beaupre>) which will need to be completed by the following Wednesday. At the moment, this is a weekly chapter of a story with a mini quiz to complete after they have read it. Your child's Purple Mash login details will be sent home with them.

### Times Tables Rock Stars

Please find time for your child to practice their 2x, 5x and 10x tables on Times Tables Rock Stars. Your child will need to go into 'Garage' mode in order to practice these specific tables. A log in for this has already been sent home with your child, but if you require login information then please get in touch with the class email address.

### Reading

Please ensure that your child is reading at home daily.

### Half Term Project

In Science this half term we are learning about plants. Here are some suggested plant related projects which you could carry out over the half term. Please feel free to do more than one of these if you wish to do so.

- Make a 3D model of a plant, label it (flower, stem, leaf, root) and explain the importance of each of these to the plant.
- Grow a plant and keep a diary of its progress as it grows.
- Help look after a plant and write some instructions about how to look after a plant.
- Look into the importance of bees as pollinators of plants and create an information book about it.
- Go on a nature walk and compare different plants and create an information booklet about what you find.
