

# PURPLE CLASS

## AUTUMN A 2023

What a great half term we have had! During this half term we have thoroughly enjoyed learning about the Stone Age. We have created our own cave art in the DARK by only candlelight. We have made and tasted stone age stew and bread. To understand the importance of archaeology in history we borrowed REAL artefacts from Wisbech Museum and studied them. In art, we also painted our hands using berries and created non - chronological reports about everything we have learnt.

We have also enjoyed our writing topics, especially writing our gothic stories about a haunted church. To gain inspiration we visited the local church to collect ideas and soak in the atmosphere. We also explored strange and unusual fruit to help us to use our senses to collect a range of awesome adjectives for our writing. The stories were fantastic and some are displayed in the church for everyone to see.

In poetry, we joined other Year 3 children from Wisbech school's and participated in a workshop with author Sita Brarmachari and wrote our own poems about birds. These will be published in a book for all to see, watch this space.....

We have also explored letter writing and wrote letters to the government, expressing our concern about the idea of shortening the school holidays! We are awaiting their response...

ABC

In Maths, the children have been focusing on place value. The children have used resources to make different numbers. They have also investigated how numbers can be partitioned in different ways.

In Science the class have been looking at rocks and how they are formed. We have enjoyed sorting rocks into groups, observing and discussing different types of rock. We thoroughly enjoyed testing rocks with vinegar to determine whether they were chalk or lime stone. Finally, we have loved singing in rounds to famous songs in Music.
