

A Busy OPAL Week!

These last couple of weeks, the children have been full of creativity and energy while exploring of a range of materials and activities. They found new and exciting things to make, build, and decorate, despite the chilly weather! A group of children worked together to design a fantastic Lego world, complete with imaginative structures and stories. In the mud kitchen, plenty of 'food' was on offer as the children mixed, poured, and served their creations with pride. Our den-building area was also a big hit, especially with the addition of a "new slide", which encouraged even more collaborative play and problem-solving. It has been a wonderful time of imagination, teamwork, and exploration.
